We can provide you with competitive prices and comprehensive information on cars from all over Japan. We are based in Central Japan, Gifu Prefecture. We have been trading in new and used-vehicles for 30 years.

Our concept is to be a smart and friendly car shop.

We are in a position to serve technical guidance for repairs and maintenance by our five staff ex-workers at a TOYOTA dealer, and having close relationships with TOYOTA.

We have a member of the repair and maintenance first class national qualification, and also have a used car quality inspector AIS third class qualification, so we understand throughly about used-cars accident history.

We have a global network with used car Auction sites in Japan, among whom we could handle mutual stock cars and sell them to customers.

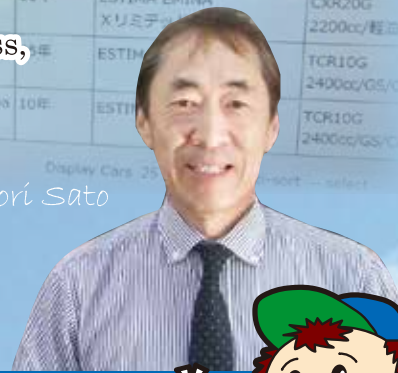

This means easy and best purchase resources.

Our business is depending on end users, so high quality used cars with full maintenance.

We have also an experience for used-car export business, and now plan to start a business into the Australian market.
